

Cloud management made easy with  
**NSEIT ICMP**

**BROCHURE**

Flexibility, speed, and lower total cost of ownership [TCO]-IT departments at organizations must deal with seemingly conflicting objectives. And for those in financial services, there are additional security and regulatory compliance challenges to contend with. Cloud is the obvious way forward, but the landscape is also often diverse and fragmented here. Consequently, around \$100 billion are expected to be wasted by organizations as they embrace the Cloud, according to **McKinsey and Company**, which further says that, on average, cloud initiatives run 14 percent over budget while 38 percent have time overruns. Companies need a way to manage their Cloud initiatives cost-effectively.

NSEIT's Integrated Cloud Management Platform helps financial services providers chart and manage their cloud journey with greater certainty of both time and budget.

## Trouble on the **Cloud**

The existing cloud infrastructure at most companies is diverse [multi-cloud, multi-tools], fragmented, and often co-exists with decades-old legacy infrastructure. This results in the following:

- ▶ Greater resources and time requirements in provisioning of new features and services
- ▶ Lack of visibility into specific infrastructure and associated security vulnerability
- ▶ Inability to optimize performance
- ▶ Inability to optimize costs

## NSEIT Cloud **Management Platform**

Cloud management platforms (CMPs) are software that manages multi-cloud services and resources. As businesses move more and more towards using multiple cloud services at the same time, they need a way to manage them conveniently.

NSEIT provides a centralized platform using ICMP workspace for helping Clients with:

- ▶ Governance
- ▶ Lifecycle management
- ▶ Automation of all managed cloud resources
- ▶ Many other processes that relate to or interact with cloud services

Exhibit 1: NSEIT CMP at a Glance

The cloud management platform architecture is designed to provide consolidated public and private cloud environments with a single-user portal. The CMP enables enterprises to track IT resources, compliances, and cloud spending in a single window.

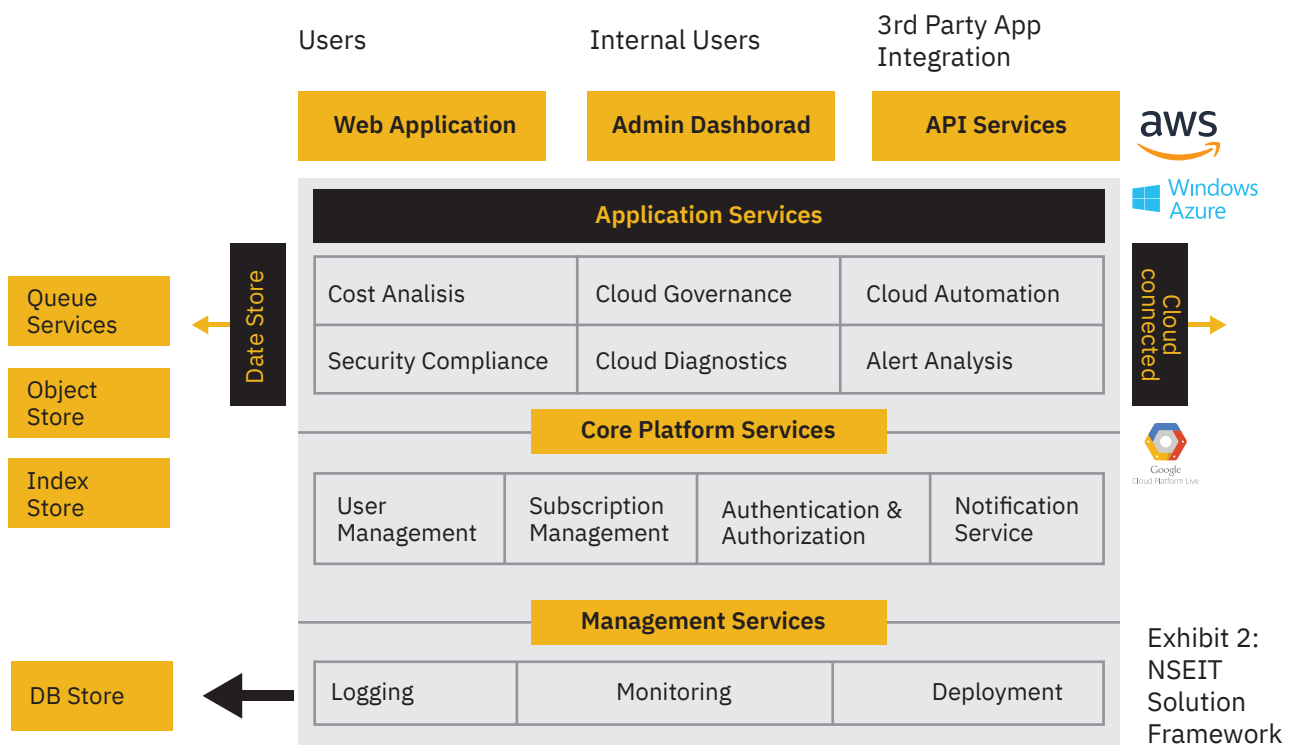

Exhibit 2: NSEIT Solution Framework

## Key Attributes of NSEIT CMP

- ▼ Built mainly with Cloud-native tools.
- ▼ Ability to select optional tools from best-in-class market-leading partners.
- ▼ Ability to customize the platform to cost, performance, and functionality.
- ▼ Integration with DevSecOps to accelerate clients' DevOps journey.
- ▼ Flexibility facilitates integration with clients' in-house tools.
- ▼ Innovative and out-of-the-box solution blueprints for faster time to market.
- ▼ Bringing ITOps closer to NoOps

# The benefits of the **NSEIT CMP Solution**

1  
Faster time to market/time to provisioning through integration with DevOps and more

2  
Faster time to market/time to provisioning through integration with DevOps and more

3  
Greater security with in-built security, compliance, and cloud governance mechanisms

4  
Reduction in compliance oversight risk with greater visibility and policy assurance enablement

5  
Faster resolution of issues, rollbacks, etc

## NSEIT **Edge**

Our solution combines NSEIT's deep understanding of the technology landscape in the financial services industry with cutting-edge tools and processes, resulting in a solution that:

- Integrates easily with a wide variety of Cloud service providers (CSPs)
- Captures data from multiple clouds and Cloud management tools and customizes it to the needs of business users/technical users through role-based access control-all from a single user interface
- Comes with pre-integrated and pre-configured ready blueprints to reduce deployment time
- Automates Cloud-resource discovery, naming, and (importantly) tagging of cloud resources, regardless of which or how many Cloud providers are used
- AI and machine learning to help remediate problems and optimize operations

## About **NSEIT**

NSEIT Limited is a digital native technology company that engineers world-class solutions to help our global customers accelerate their digital transformation journeys. Our key service pillars are Application Modernization, Business Transformation, Data Analytics, Infrastructure &

Cloud Services, and Cybersecurity, through which we create intuitive digital experiences and tangible business impact. For over two decades, our innate drive for excellence has made us the partner of choice for global organizations. At NSEIT, we fuel digital progress.
